# DELIVERING MODULAR HOUSES

Factory Made Fast Track Houses

*EvoFrame is a volumetric modular designed, self-supporting, structurally strong timber frame building solution. It's a process of supplying factory built houses to site without size restrictions, able to be transported on standard flatbed trucks and trailers at any time of the day or night - without 'abnormal' or 'wide load' restrictions*

**EvoFrame offers the opportunity to substantially improve the provision of mass housing across the country**

Designed for Living & Optimised for Production, EvoFrame offers an all-encompassing solution that has left no stone unturned and provides a deliverable modular system with no future restrictions ensuring long-term business sustainability ...
